

# Intralinks VDRPro™ Portfolio

## An enhanced view to showcase your assets

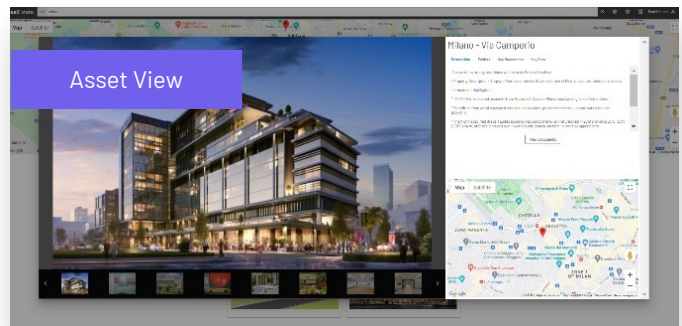

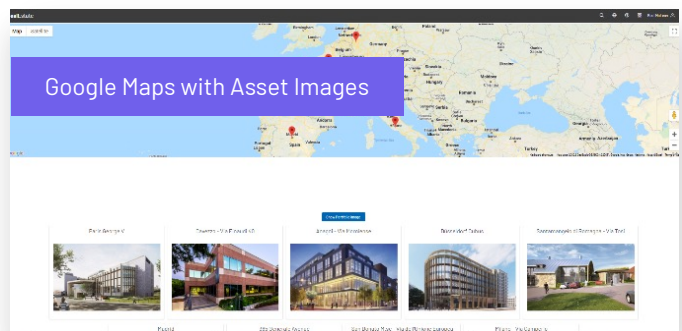

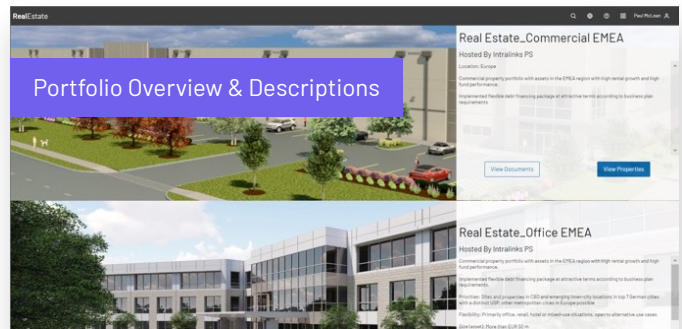

Whether you own a commercial real estate portfolio, alternative energy assets or a fleet of jets, maintaining a comprehensive online catalog of your holdings can be a challenge. Even when data is properly organized, navigation and collaboration become increasingly complex as your portfolio grows.

At SS&C Intralinks, we built the modern virtual data room to help bring order to an ever-increasing mountain of data. With VDRPro Portfolio, users benefit from an entirely new view of that data, built to display your hard assets in the best light.

### Your assets – optimized

Portfolio sits on top of VDRPro, extracting specific user-defined data from the VDR to populate a custom-built interface. It provides a new window to your data, displaying asset information in a unique and user-friendly way. You can easily navigate Portfolio to identify a specific asset and click through to see all relevant images and documents.

Since all the content in Portfolio is sourced from VDRPro, you maintain complete control – and benefit from the most comprehensive VDR feature set in the market. Plus, with the assistance of our Professional Services team, Portfolio setup is fast, simple and has minimal impact on your traditional VDR management.

## From Marketing to Divestment – Portfolio can help

With Portfolio's comprehensive and easy-to-navigate view of your assets, you can benefit at any stage of the lifecycle.

### MARKETING

Use rich media to easily showcase key data about the available asset

### DUE DILIGENCE

Benefit from comprehensive preview and seamless access to underlying documents

### MANAGEMENT

Keep investors and partners up to date on asset performance

### DIVESTMENT

Clearly present your Portfolio of available assets to prospective buyers

## Key features

With Portfolio, you'll benefit from a number of innovative features:

- **Portfolio snapshot** – A meta-view that allows you to understand the contents of multiple Portfolios at a glance
- **Geolocation** – Google Maps integration means you can see the location of each asset in the Portfolio
- **Asset description** – Easy-to-view information on each underlying asset that doesn't require you to access any specific documents in the VDR
- **HD image library** – See multiple images of an asset without opening multiple image files
- **Enhanced search** – Search asset names and descriptions to identify relevant content in seconds
- **Key documents** – Identify key documents without looking through multiple subfolders
- **Asset-based key data** – Create custom data fields, like valuation, size, purchase price, etc.
- **VDR integration** – Navigate to the underlying VDR at the click of a button

## About Intralinks

Intralinks is the pioneer of secure file sharing and virtual data room (VDR) technology. Our solutions have facilitated strategic initiatives such as mergers and acquisitions, capital raising and investor reporting. With 6.6+ million registered users around the globe, the Intralinks platform has been used to execute over USD 34.7 trillion worth of financial transactions.

### Independently verified and certified

More than 450 independent, client-led security audits and penetration tests of our data centers have been conducted since 2014. Numerous certifications are available to support regulatory and risk assessments.

### Bank-grade security

We incorporate multiple layers of protection at the data center, employee, product and individual file/document levels. Rely on two-factor authentication, SSO, DDoS protection and more.

### Trusted partner and brand

Our 25+ year legacy as the pioneer in VDR technology means that we have long-lasting relationships with clients at all the major banks who trust our brand, service and the security we consistently deliver.

### Financial and operational security

Intralinks is backed by parent company SS&C, a USD five billion revenue company with a 30+ year history in fintech.
