

Making a deal? Make it safer, simpler and smarter in a New Intralinks Virtual Data Room

The world's fastest and most popular data room now has innovative features that add speed and value to every phase of your deal lifecycle.

We started all this. But we never stop improving.

As the pioneer of the virtual data room for secure, high-value transactions, we know how to connect and transform the dealmaking ecosystem and enhance shared processes across the entire deal lifecycle. That's what we do. In fact, that's *all* we do.

The market has changed. Deals need to be done faster and better. So we went back to work – back to the basic idea that started all this: to make it easier for professionals across the dealmaking spectrum to feel absolutely confident in their dealmaking technology, so they can focus on the deal itself.

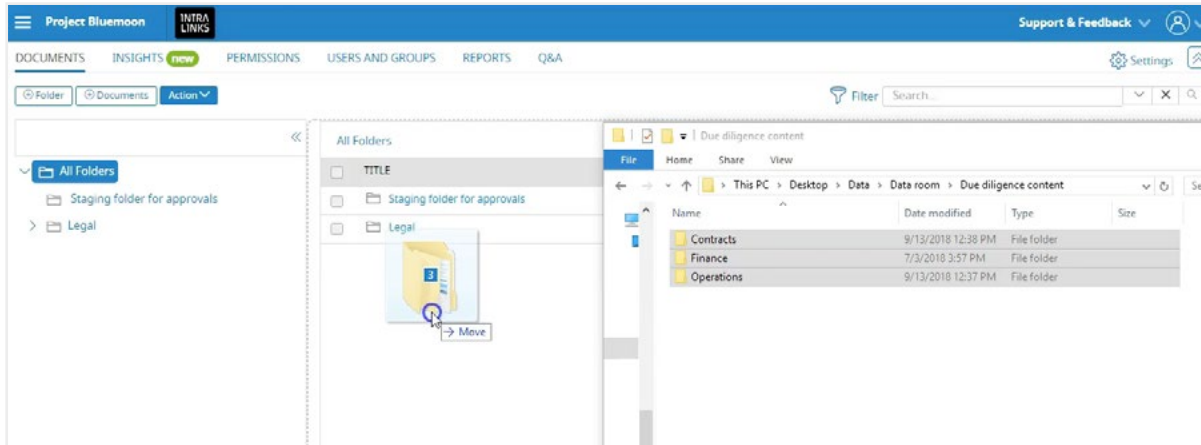

So, what's new?

This new release of the Intralinks Virtual Data Room features a number of new and refined capabilities designed to increase your dealmaking productivity.

- **Vastly improved user navigation.** A new intuitive interface that responds as quickly as you do to fast-breaking dealmaking decisions – now with the capability of multitasking between data rooms for unrivaled efficiency.
- **Updated Intralinks VDR for mobile.** A feature-rich mobile VDR app that keeps your deals moving – even while you're on the move.
- **Streamlined user invitations.** An elegant, simplified process for adding users to your data room.
- **Faster data room setup.** Enhanced drag-and-drop capabilities that let you upload entire folder structures and documents to a VDR from desktop.

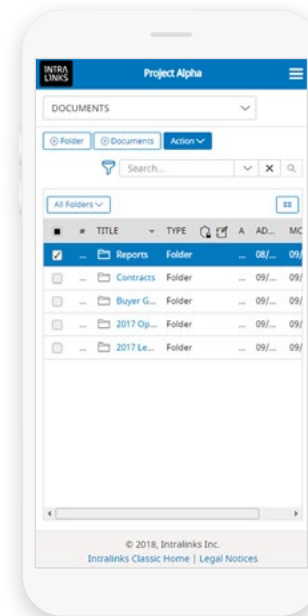

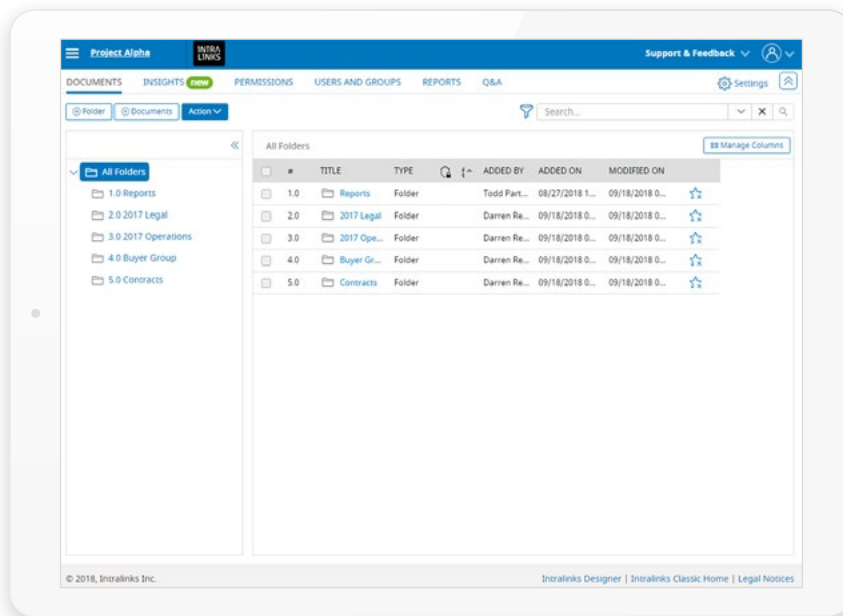

Drag & Drop Folder Upload

Upload entire folder structures and documents to a VDR simply and fast from your desktop to VDR web application.

Updated Mobile App

Access your data rooms from anywhere, anytime, on iOS and Android devices, to perform common data room tasks like document review and permission management.

Our goal is to help you meet yours.

We're continuously adding new features to the Intralinks platform, with the goal of helping you prepare your data rooms faster and execute better. Our team works hard to make dealmaking tools intuitive and technology transparent, and to automate time-consuming tasks that can distract you from making the best deals, every time.

Find out more about our recently released M&A Workflow™ feature that streamlines third-party approvals and other new Intralinks tools for accelerating deals.
